HOW TO INSTALL

Always refer to your HALOCOUTURE Professional Color Ring when finding the best color match for your client.

Place

Place the Miracle Wire 1-3 inches behind your client's hairline. Holding your index fingers on either side of the weft, use your thumbs to slide the back of the weft down to the occipital bone. The HALO should feel snug.

Secure

Working your way around the head, pull the client's natural hair sitting above the weft out and over with the tail end of your comb. The back of the weft should sit just beneath their occipital bone.

Blend

Using the pick on the top of your comb, remove hair that is trapped under the Miracle Wire. Comb hair in the same direction as the wire to remove any additional trapped hair. Brush hair to blend seamlessly.
